CLIMATE ADAPTATION PLAN
‘30 BY 30’

choice
Together we enrich lives

Climate adaptation refers to the process of managing the risks and impacts of climate change that are already happening or are locked in, such as flooding, overheating, storms, and disruption to services.

As part of our Sustainability & Energy Strategy (2025-28) Choice identified the importance of climate adaptation, with our risk register updated and a commitment to develop an internal ‘Climate Adaptation Plan’. The Climate Change Act (NI) 2022 places a commitment on public bodies to report on climate adaptation.

Whilst Choice is not bound by this statutory obligation, given the potential impact on our tenants we felt it was important to voluntarily produce a climate adaptation plan with clearly identified targets to progress.

Choice have reviewed the UK climate change risk assessment (CCRA3), and engaged with internal and external stakeholders to identify 14 key risks, which span 8 key areas.

‘30 by 30’ refers to 30 actions which have been identified and assigned to internal departments, and allocated to specific financial years to 2030, allowing progress to be tracked and reported annually.

A key stakeholder is ClimateNI who have commented that *“Every organisation has a part to play in planning for a more resilient future, and it is fantastic to see Choice Housing showing leadership by developing its first climate adaptation plan, aligning with the intentions of the Climate Change Act (Northern Ireland) 2022.”*
